

Rectangle Pipe and Fittings Construction Standards

Positive and Negative Pressure

Gauge selection for G60/G90 galvanized steel (ASTM A653), paint grip (A40) steel, type 304 stainless steel, and poly coated steel (PCS/PVC). Adjustments must be made for the use of 3003 aluminum. Standard seams are Pittsburgh lock, type L-1, for both pipe and fittings. All seams are factory sealed.

Legend: Corken Steel offers two types of intermediate reinforcement for rectangular ductwork: external reinforcement and mid panel tie rods. Tie rods at the duct joints will be provided where required in addition to the intermediate reinforcement. Two construction tables for each pressure class are provided, corresponding to each reinforcement method.

Reinforcement

Immediate Reinforcement

H REINFORCEMENT

Rollformed from 24 gauge galvanized steel. Conforms to SMACNA "H" equivalent.

X = 8" Maximum fastener (tack weld, spotweld, bolt, screw, or rivet) spacing when ends are tied, the 3/4" interval may be omitted.

When reinforcements occur at the same location on adjacent sides at 4" WG (1000 Pa) static and over, tie the ends.

For duct \geq 4" WG, ends of reinforcement must be tied together.
